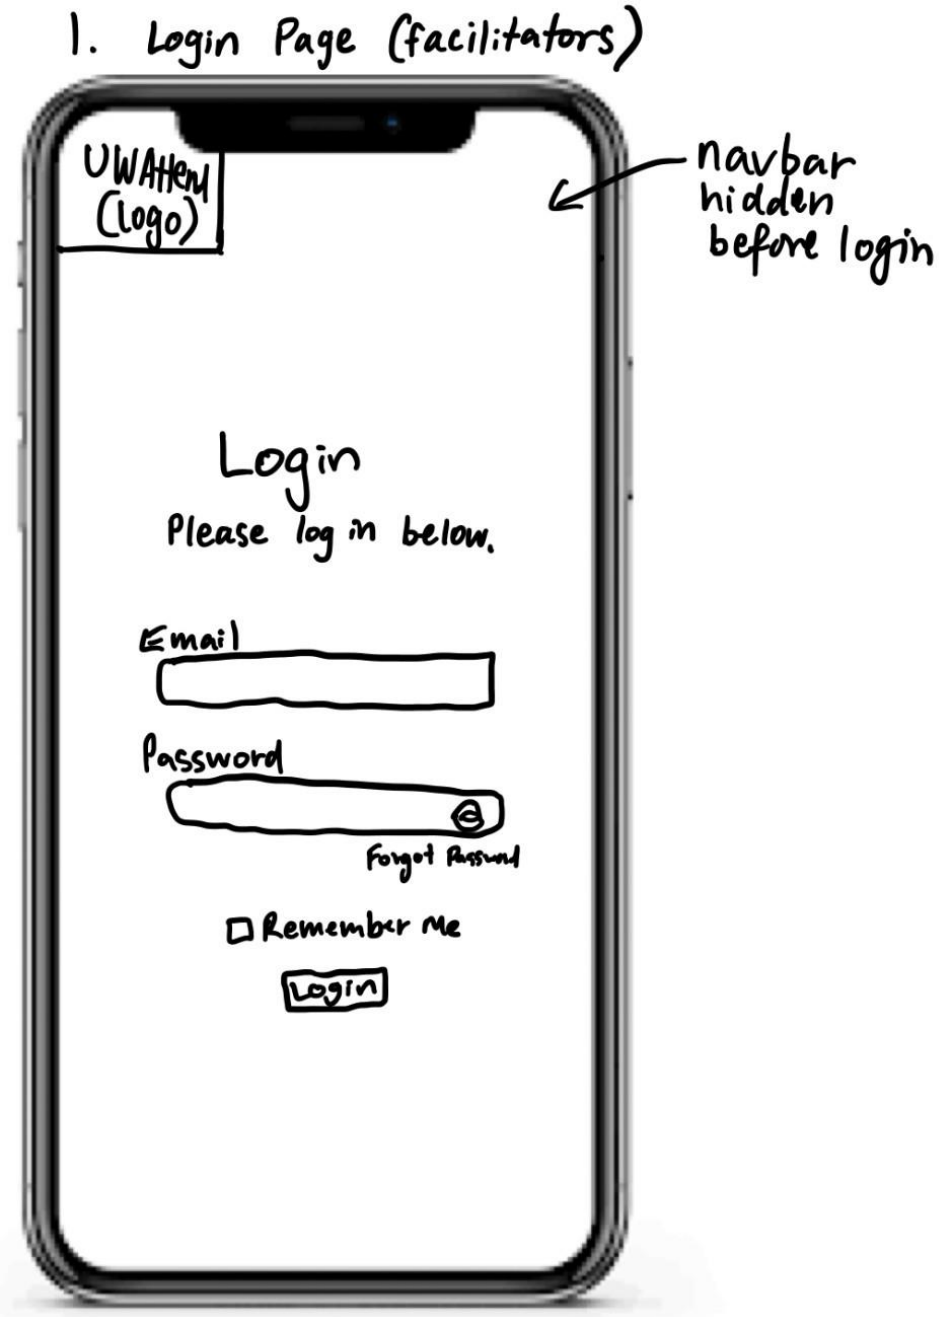
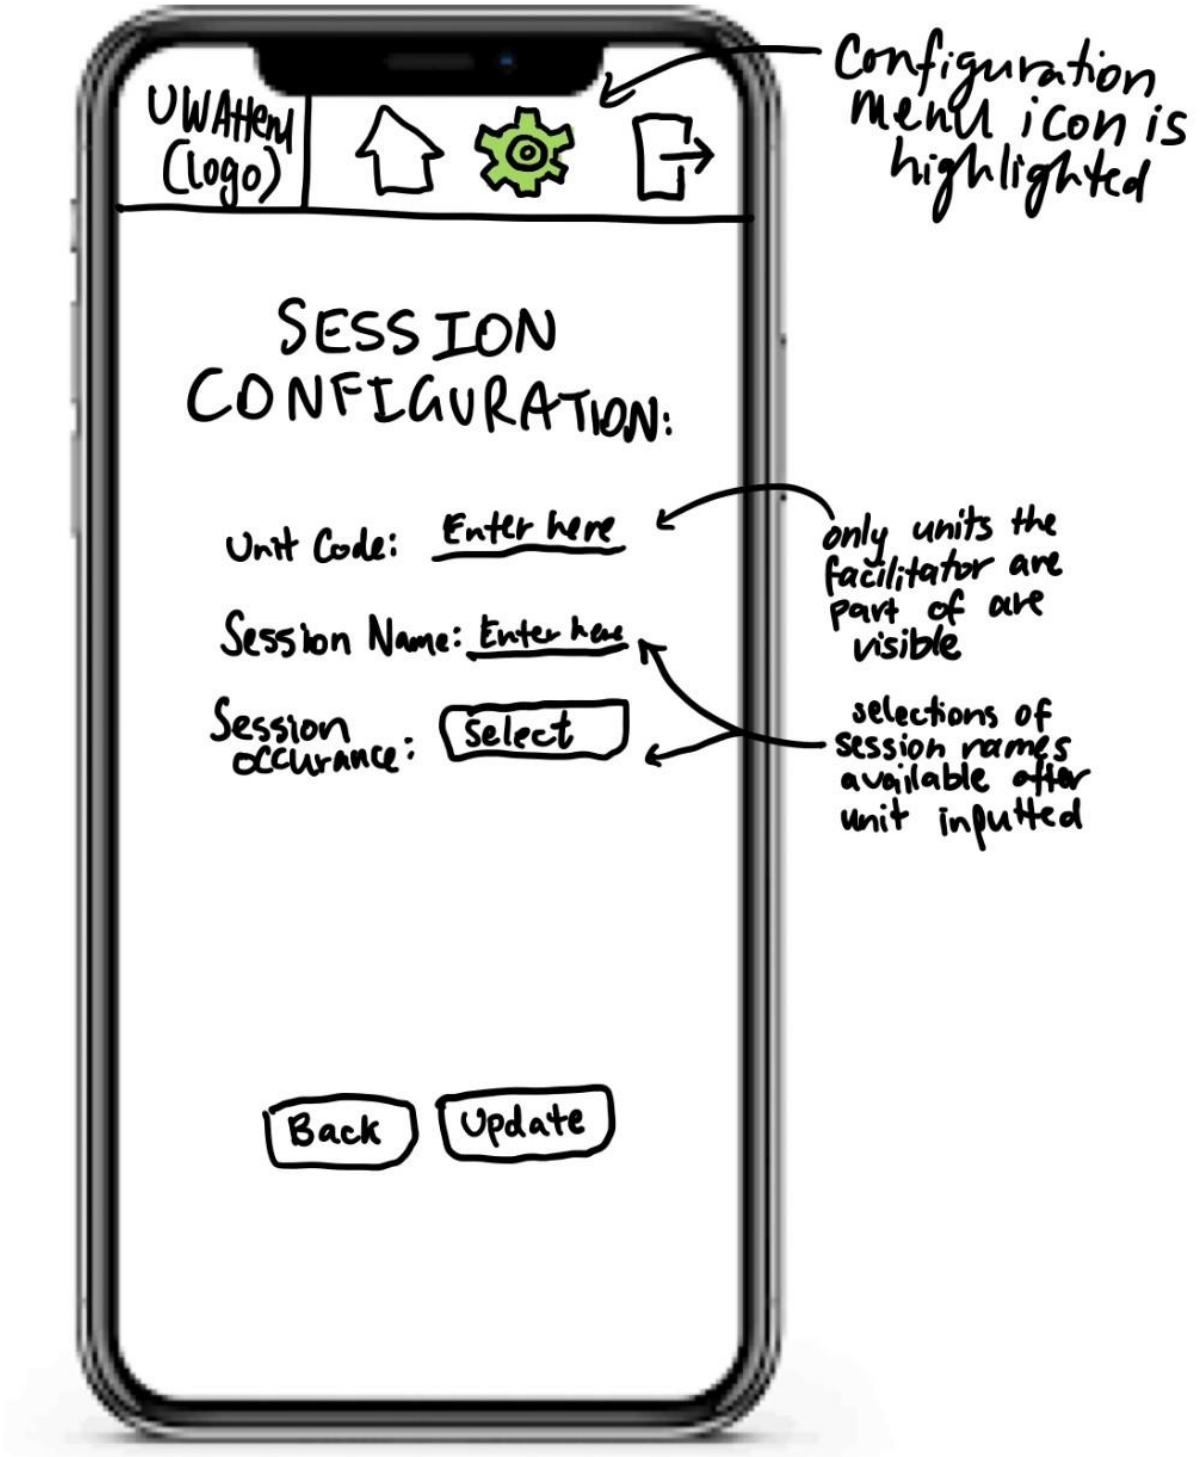
User Flow Diagrams – draft 3

Key changes:

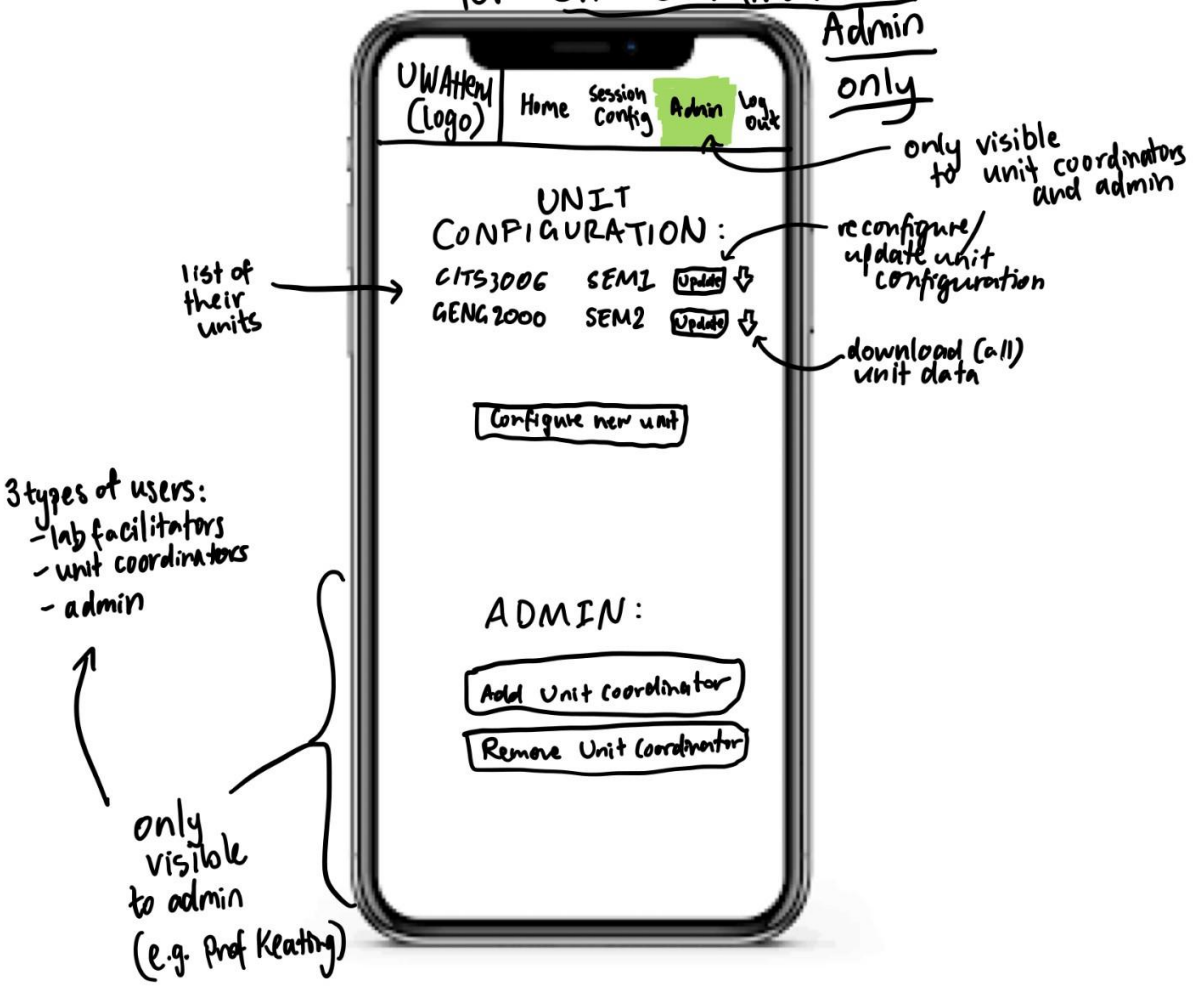
- Added admin page (only for unit coordinators and administrators) which has unit configuration and ability for admin users to add/remove unit coordinators – see **2b and 2c**
- Now every users' session configuration is the same – see **2a**
- Scroll instead of pagination for class list – see **7**



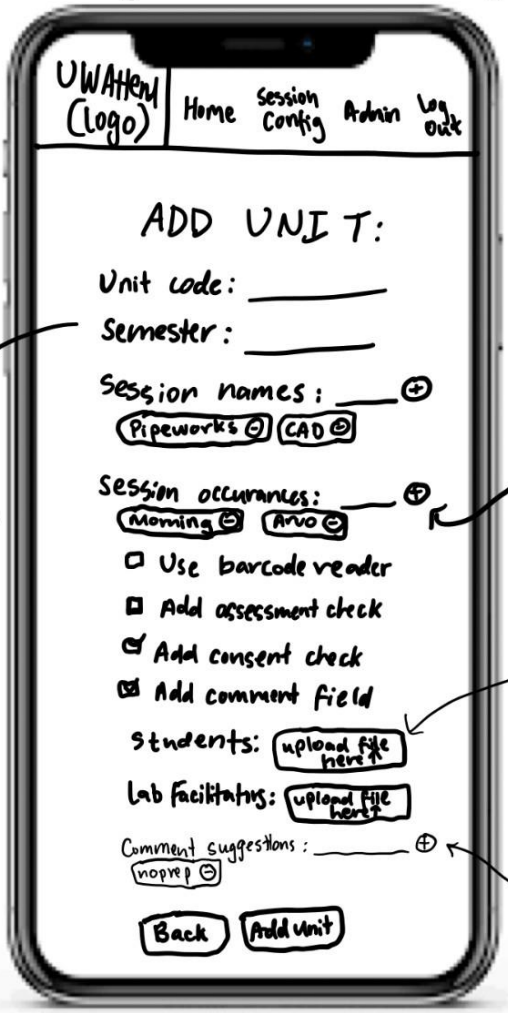
2a. Configuration Menu Page



2b. Configuration Menu Page for Unit Coordinators & Admin only



2c. Add Unit configuration (unit coordinators only)



including non-standard times (but year is known)

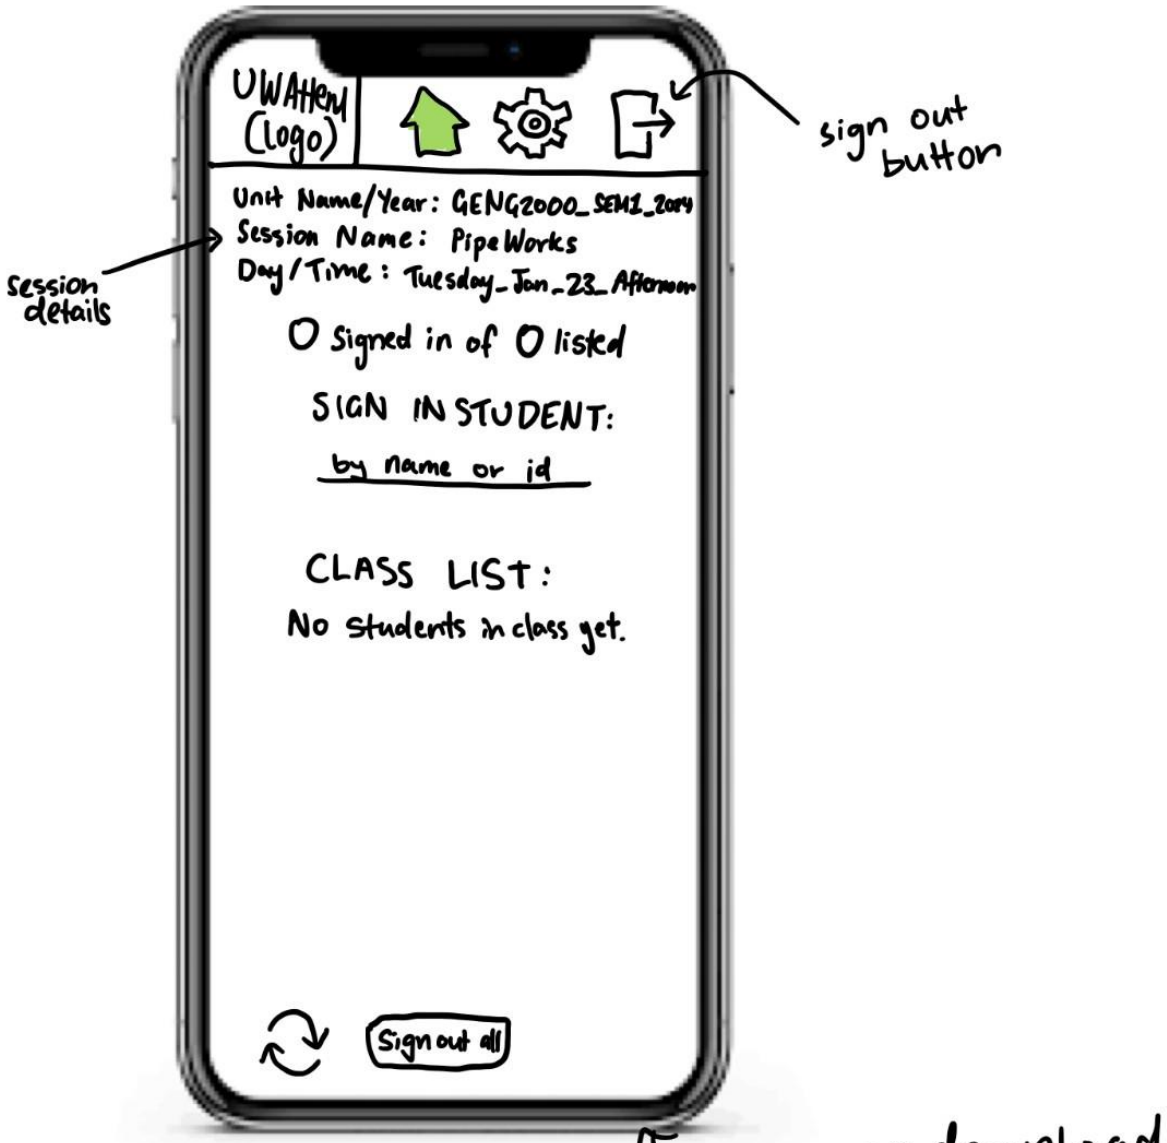
set selection available only

csv file containing names, numbers of enrolled student

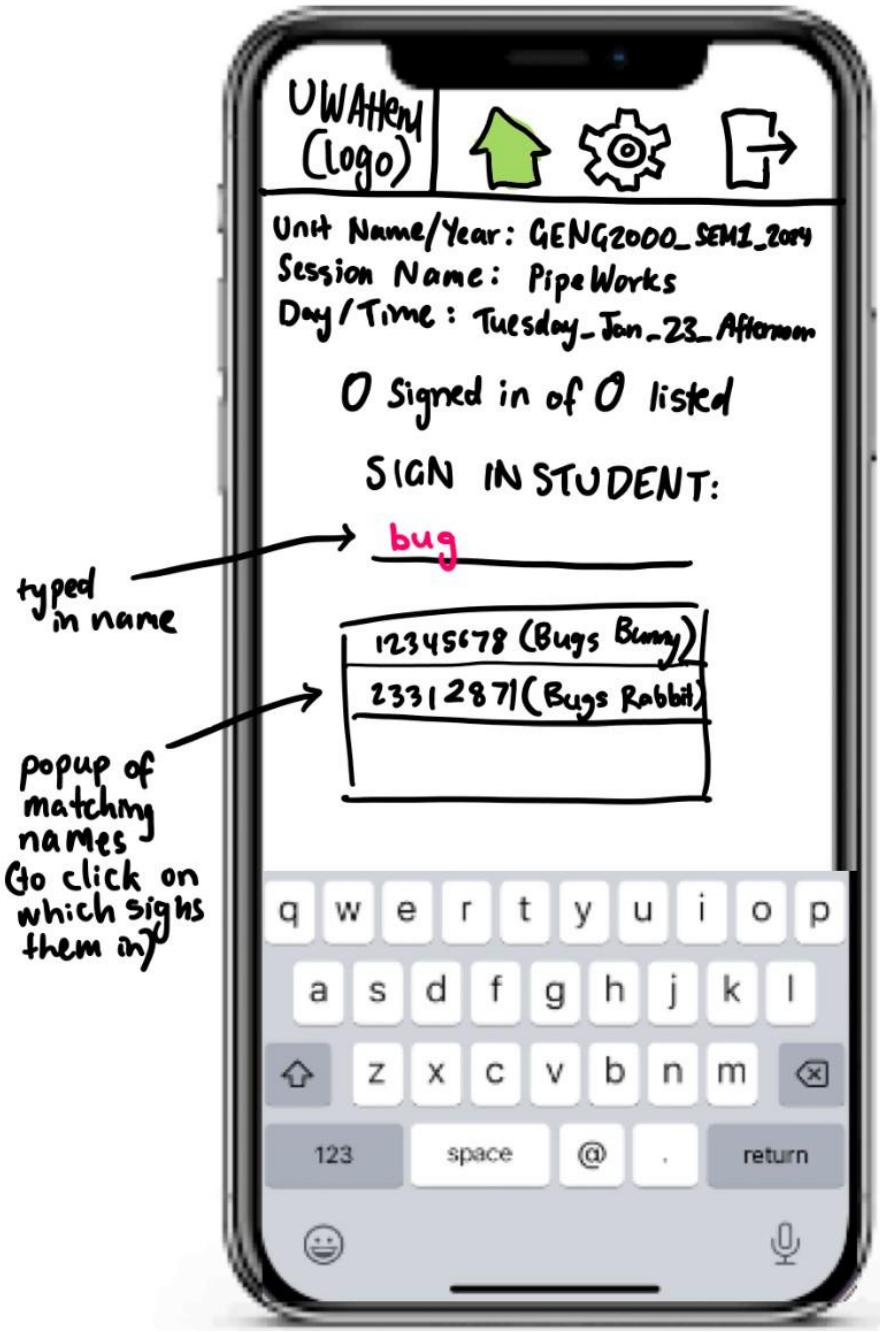
if comments field is ticked, this appears

similar with if assessment check is ticked → space for extra details to be given

3. Homepage (immediately from config menu, i.e. 0 students)

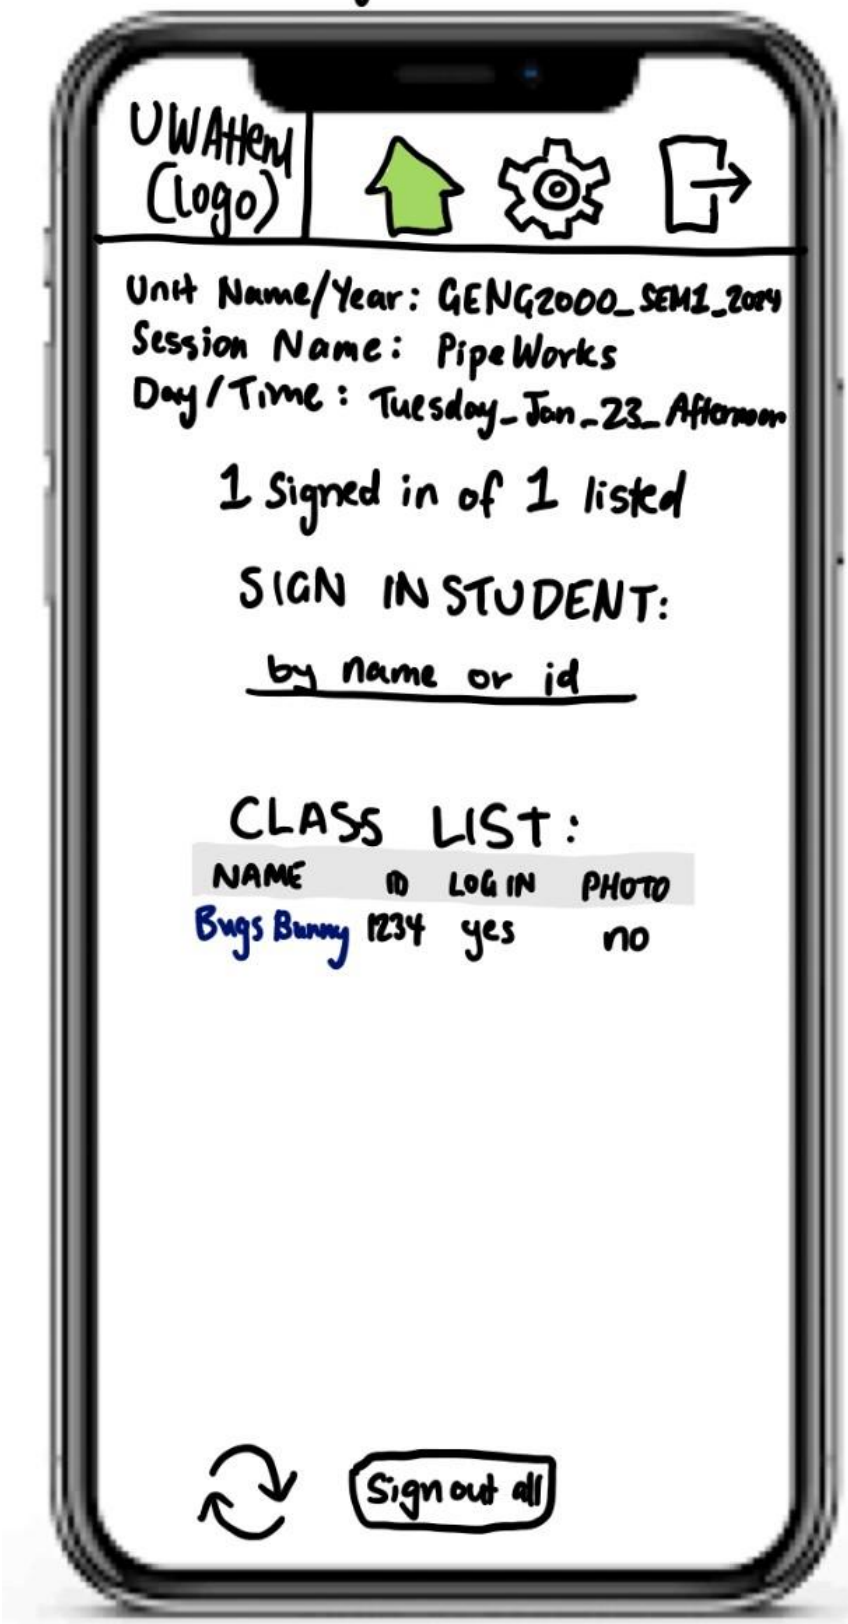


4. Home page (signing in a student)

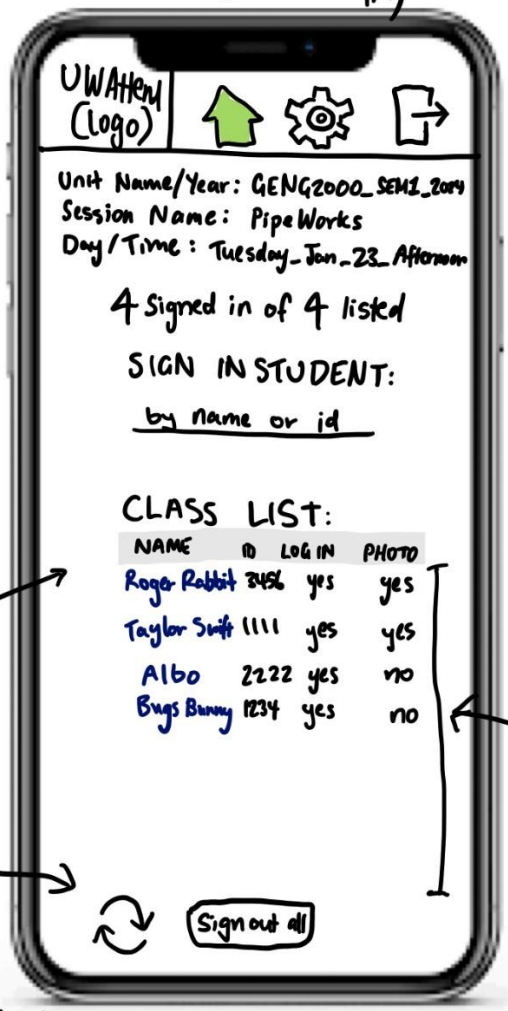


5. Consent to Photography Popup (Modal)
(after clicking on student to sign them in)

6. Homepage (after student has signed in)



7. Homepage (after multiple signed in)



names hyperlinked to student (individual) page

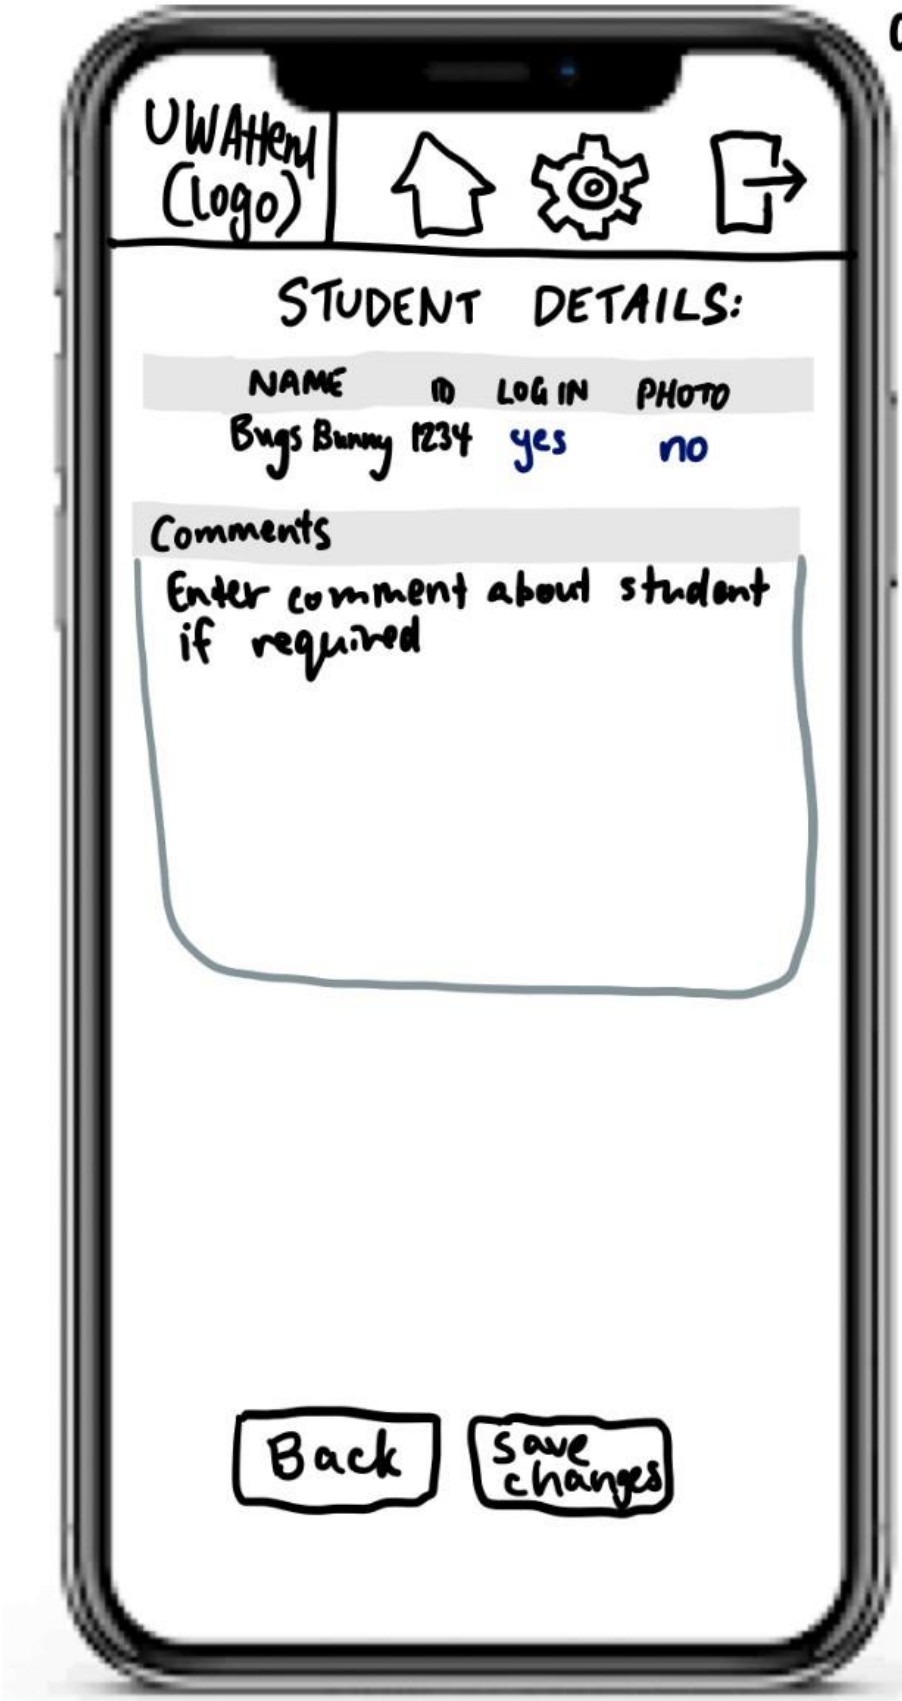
most recently signed in student at top of list

scroll when list gets large (below buttons and above info stay frozen)

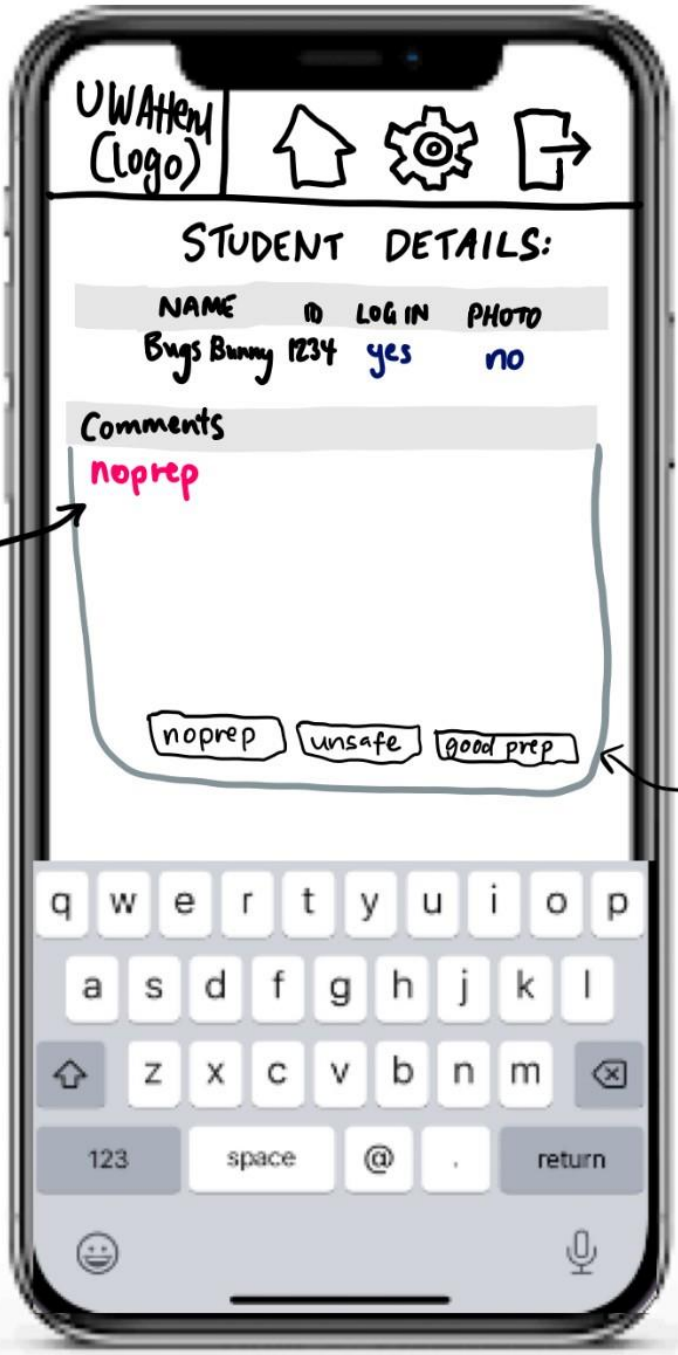
to sync data with remote db

after clicking, a popup will appear to double check session details if they click yes, syncing occurs

8. Student Page (after clicking on student's name in class list)



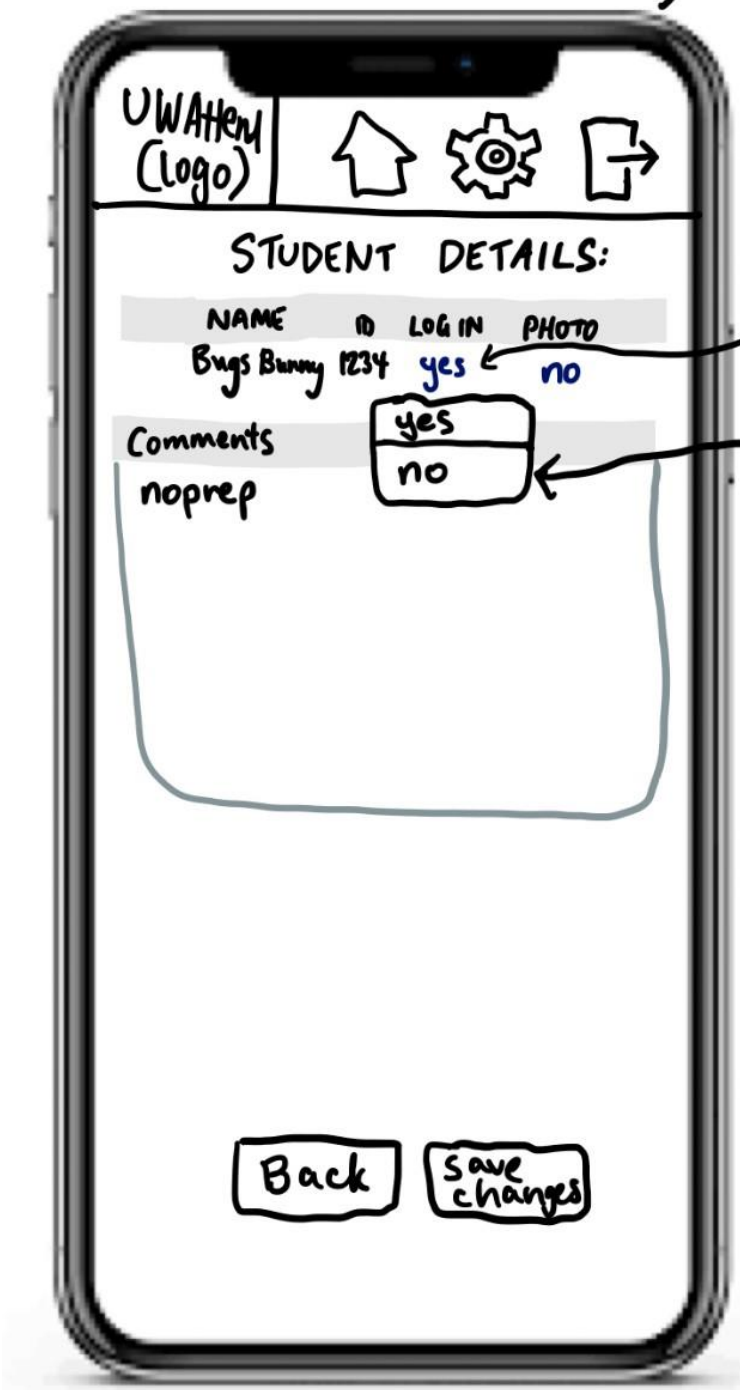
9. Student Page (adding a comment)



Click on comments box to type in a new comment/ edit existing one

suggested comments (clicking on them adds them)

10. Student Page (changing log in field)



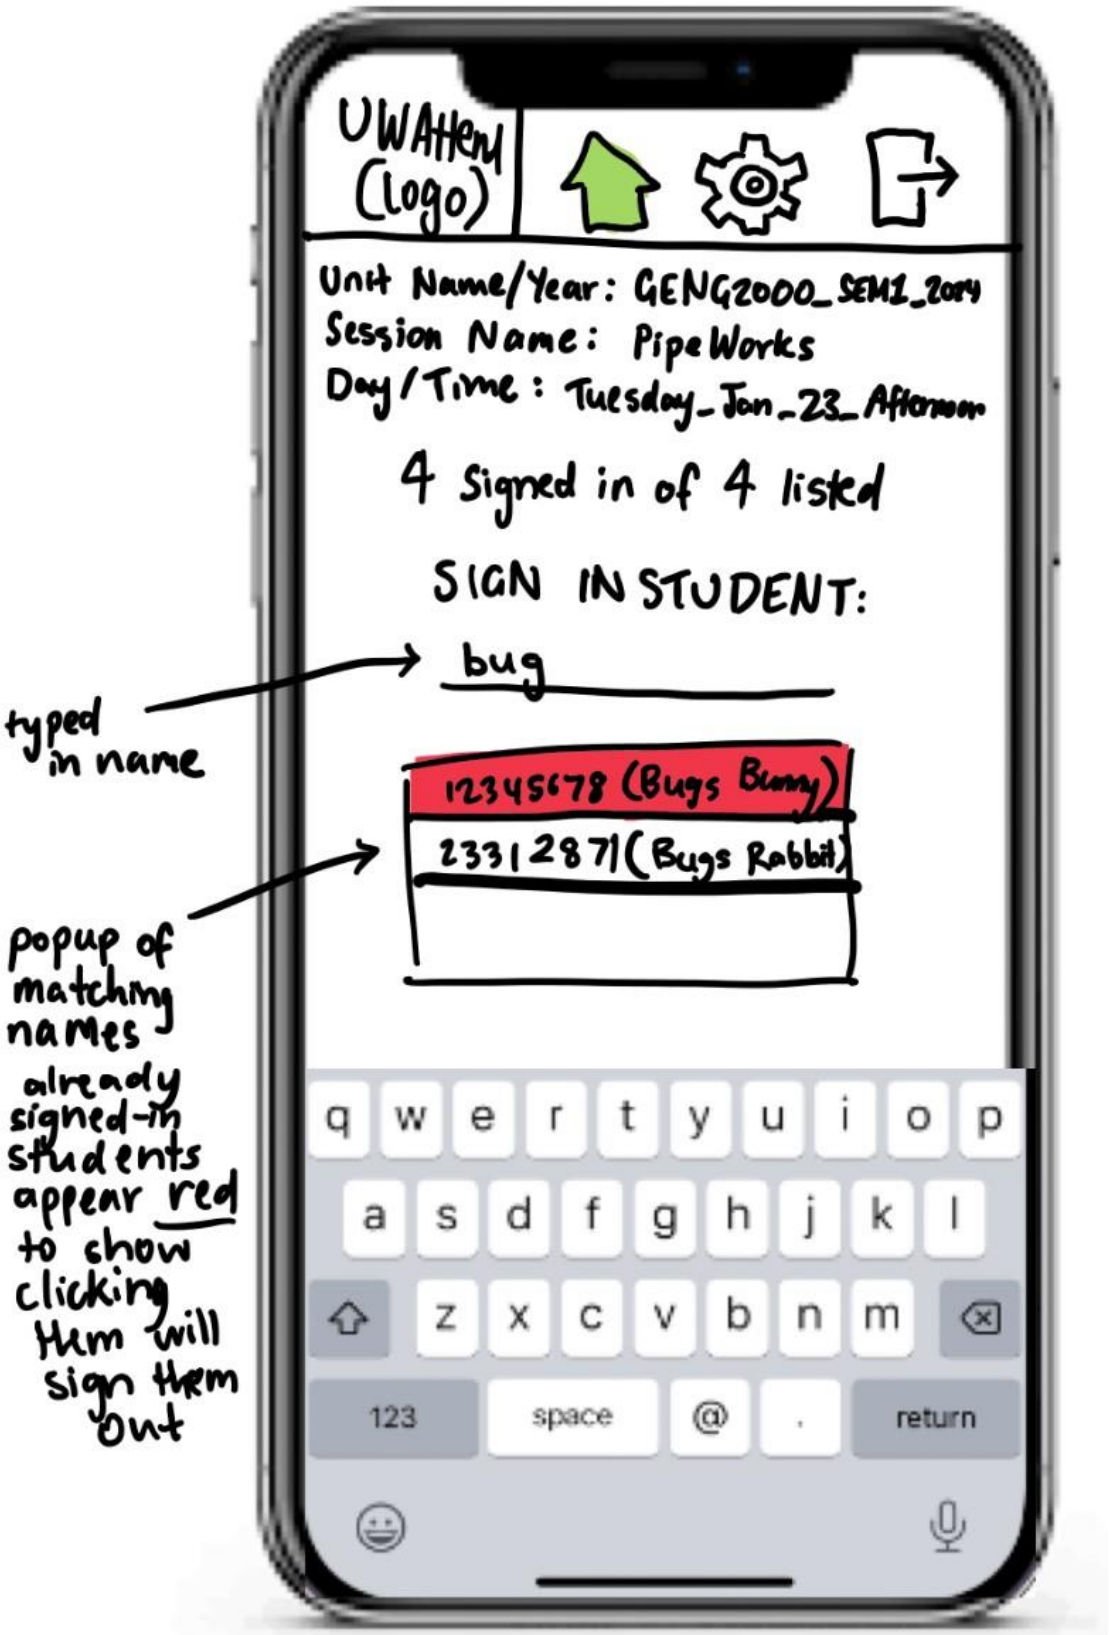
click on the current field (i.e. "yes")

a select box appears

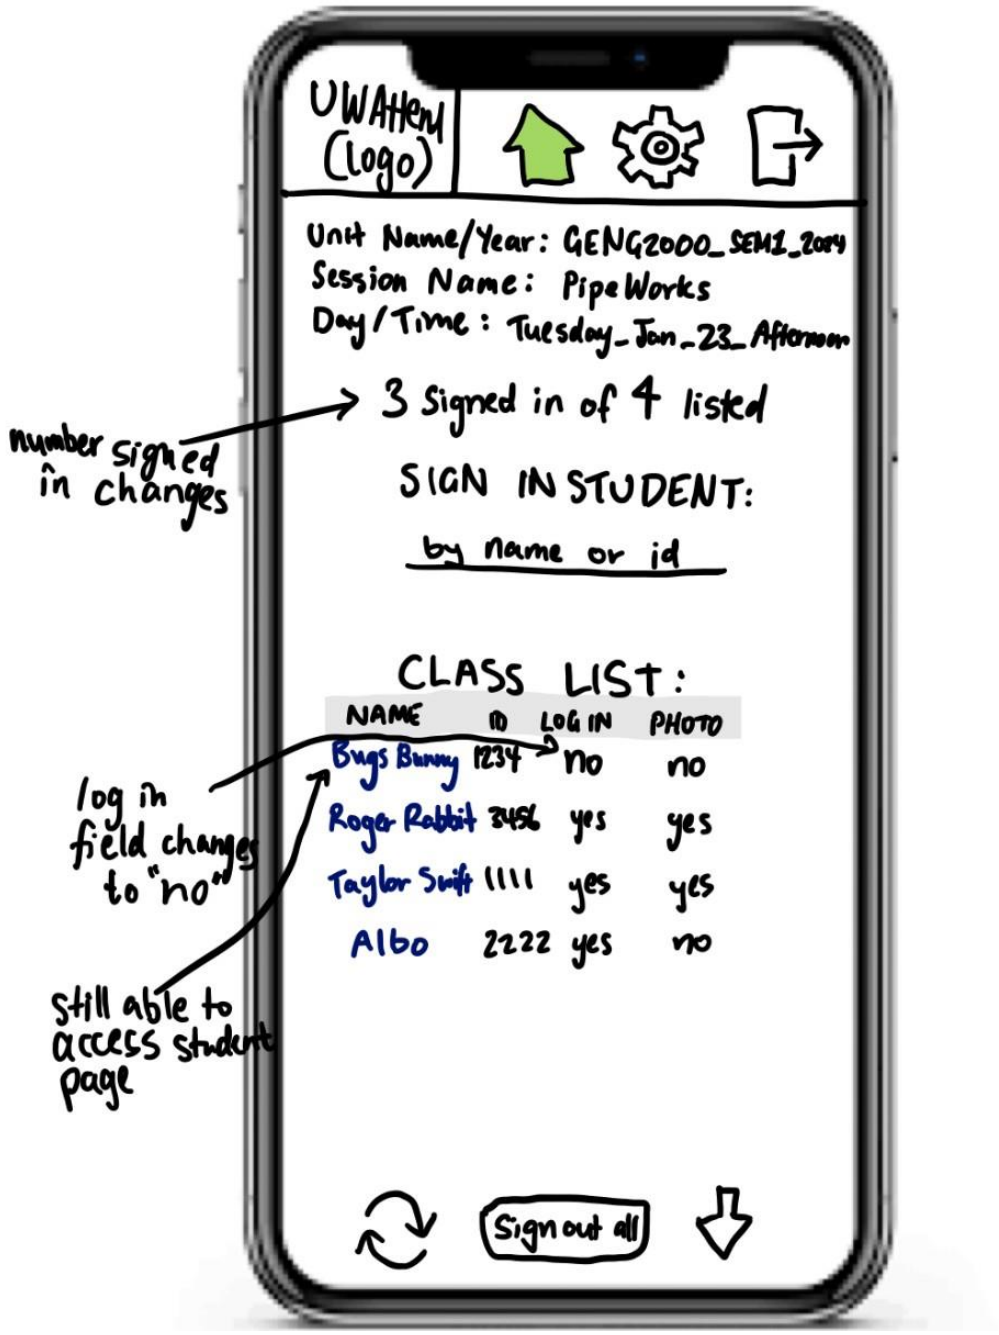
user selects the correct option

(same for photo consent)

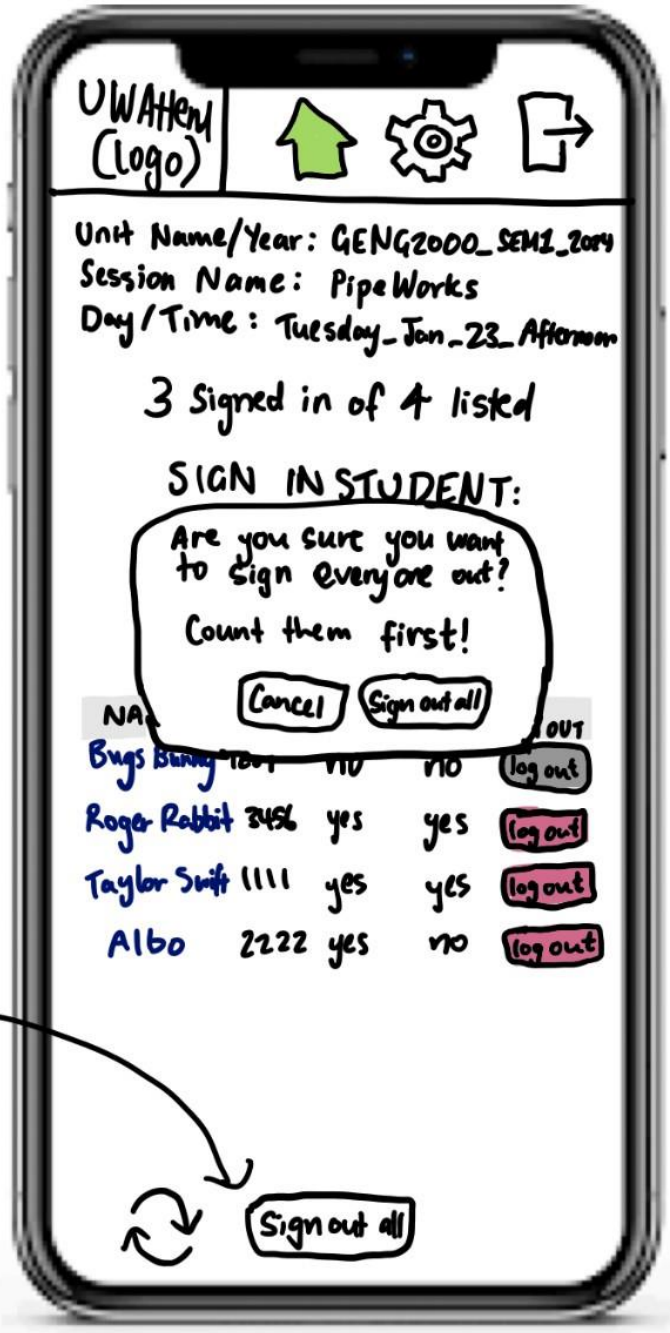
11a. Home Page (logging student out)



11b. Home Page (after logging student out)



12. Sign out all Warning (modal) (after clicking "sign out all")



press here to sign out all students
